

WEBDek 개발자가이드

Supply Chain Management Innovation Company Introduction

1, 폴더구조

2. 패키지구조

3. 신규 모듈 추가

Mybaits sql xml 추가(namespace 중복 불가)

새로운 package 추가

Page 접근이 가능한 기본 구조 셋팅

```
@Controller
public class NboardController extends BaseController {
    private static Logger logger = LogManager.getLogger(NboardController.class);
    @Autowired
    private NboardService nboardservice;
    @RequestMapping("/board/{page}.*")
    public String page(@PathVariable String page){
        return "/board/"+page;
    }
    @RequestMapping("/board/{module}/{page}.*")
    public String mpage(@PathVariable String module, @PathVariable String page){
        return "/board/"+module+"/"+page;
    }
    @RequestMapping("/board/{module}/{sub}/{page}.*")
    public String spage(@PathVariable String module, @PathVariable String sub, @PathVariable String page){
        return "/board/"+module+"/"+sub+"/"+page;
    }
}
```

새로운 JSP 폴더 추가
